

# Life, the Universe, and Everything

Your program is to use the brute-force approach in order to *find the Answer to Life, the Universe, and Everything*. More precisely... rewrite small numbers from input to output. Stop processing input after reading in the number 42. All numbers at input are integers of one or two digits.

## Example

### Input:

```
1
2
88
42
99
```

### Output:

```
1
2
88
```

## Information

In case of any problems with your code, you can take a look in the [forum](#), you'll find the answer, only for this problem, in various languages.
