

BrainF**ked

Your task is to print XYZAVMSHT

in BF

Note: You might need this: <http://fatihelikli.github.io/brainfuck-visualizer/>.

As a programmer, you need to make your program as efficient as possible :)

PS: My current code is only 90 B

Input

There is no input.

Output

Output consists of a line containing the word "XYZAVMSHT". There must be no trailing spaces at the end of printed lines, neither empty characters.

Example

Output:

XYZAVMSHT
