

Git

Description

Given an action, choose the correct Git commands to accomplish it, as follows:

send	git add -A
	git commit -m "Some changes"
	git pull
receive	git push
	git add -A
	git stash
	git pull
info	git stash pop
	git status -s

Input

The input is the desired action: send, receive, or info.

Output

Output the corresponding Git commands. Don't improvise; give the commands exactly as shown.

Examples

Input	Input
receive	info
Output	Output
git add -A	
git stash	git status -s
git pull	
git stash pop
